

ITIL® V3 Foundation “Bridge” Program Certification Program - 2 Days

Course Overview

ITIL® is a set of best practices guidance that has become a worldwide-adopted framework for Information Technology Services Management (ITSM) by many Public & Private Organizations. Since early 1990, ITIL® has been evolving from focusing on Functions and Processes under versions 1 and 2 to focusing on the Full Service Lifecycle Management under version 3.

ITIL® version 3 suggests many improvements over previous versions, including a focus on business and IT integration and a holistic Service Lifecycle approach. This course focuses on the new ITIL® V3 concepts and contents and the main differences between ITIL® V2 and V3.

Included in this course is the ITIL® V3 Foundation “Bridge” formal certification exam.

Duration

Two days

Delivery Methods

- Instructor led Classroom environment
- Virtual Web-based

Audience

This two-day course is only intended for existing holders of the ITIL® V2 Foundation Certificate in Service Management who wish to get an equivalent of their ITIL® V2 Foundation certificate to V3 Foundation

Prerequisites

- ITIL® V2 Foundation certificate

Program Content and Objectives

An effective lecture designed at achieving a clear understanding of the new ITIL® V3 Best Practice and Service Management lifecycle model, the required knowledge and pre-requisite to prepare for the ITIL® V3 Foundation Certification exam
