

Agile Scrum Master Workshop

AGL 21A – Non-Certified Scrum Master Workshop

Course Duration: 2 days

Ongoing concerns of Product teams are how to deliver better and faster results while increasing the effectiveness of the business units within the larger enterprise. Does your team have the skills to develop products at the speed of business and maintain high customer satisfaction? A way to achieve these results is to adopt the Agile Mindset and promote it within the business units and the enterprise. The Agile/Scrum Master workshop will emphasize the roles, events and artifacts created in Agile and Scrum. The role of the Scrum Master on the team will be emphasized. It will focus on understanding why the Agile Mindset is imperative to understand for learners, business units and the organization. Scrum ceremonies will be explained, and participants will understand why transparency, inspection and adaptation are an important part of Scrum. Common planning and estimating techniques will be discussed so terminology is understood while the team works within the organization. Participants utilize a case study to execute during a Sprint and teams learn how to adapt their process to a more Agile/Scrum Framework.

Target Audience:

This course is for Tech Leaders, Project Managers, Scrum Masters, Dev Team members and anyone who wants learn to coach the Agile/Scrum team to increase their productivity.

Course Objectives:

- Understand why teams need to be part of Strategy & Release Planning to understand the vision and goals of the organization and make sure requests align with the vision and strategy of the organization.
